

Instructor: Al Stickney
329L Science
Phone - 7856 (Home Phone: 390-2302)

Office Hours: 11:30 - 12:00 M W F
1:00 - 1:30 M W F
3:00 - 4:00 M W F (until 5:00 most Mon. & Wed.)
2:00 - 3:30 Tues. (until 5:00 most Tuesdays)
2:00 - 4:00 Thurs.

I teach at 9:10, 10:20, and 1:50 on MWF. Feel free to call my office or drop by any other time.

Text: *Calculus*, by Hughes-Hallett, Gleason, et al, Fourth Edition

We'll cover most of chapters 1-5, although some sections may receive less emphasis than others or may be omitted entirely.

You will be required to use a TI-83, TI-84, or TI-86 graphing calculator throughout this course. It will be used for tests and homework, and should be brought to class every day. If you're buying a new calculator for use in this course, I generally recommend that you purchase a TI-84.

You will not be allowed to use a TI-89, TI-92, Voyage 200, or any other calculator which can do "symbolic calculus" on the tests and quizzes.

Generally, homework will not be collected.

Class participation and preparation will be a factor in assigning your course grade. You will not be able to make up points missed due to unexcused absences.

- Tests:**
- (a) Three 100 point Hour Exams (dates to be announced).
 - (b) Many short, unannounced "homework quizzes". They will be about 10 minutes long and 10 points each. Your lowest 2 quiz scores will be dropped.
 - (c) A comprehensive Final Exam.

Tests during the semester will be weighted as follows -

Quizzes	100	pts.	(approximately)
3 Hour Exams	300	pts.	

The Final Exam is $\frac{1}{3}$ or $\frac{1}{2}$ of your course grade. It's half of your grade if it's better than your previous work, and one-third of your grade if it's worse.
