

Instructor: Al Stickney
329L Science
Phone - 7856 (Home Phone: 390-2302)

Office Hours: 12:40 - 1:40 M W F - by appointment
2:00 - 2:30 Tues. (also 3:30-5:00 most Tuesdays)
2:00 - 4:00 Thurs.
3:00 - 4:00 M W F (until 5:00 most Mon. & Wed.)

I teach at 10:20, 11:30, and 1:50 on MWF. Feel free to call my office or drop by any other time.

Text: *Multivariable Calculus*, by McCallum, Hughes-Hallett, Gleason, et al, Fourth Edition.

We'll cover most of chapters 12-17, although some sections may receive less emphasis than others or may be omitted entirely.

You are required to have a TI-83, TI-84, or TI-86 graphing calculator for use throughout this course. It will be used for tests and homework, and should be brought to class every day. If you have another calculator, you might be able to use it instead, but you should check with me first.

You will not be allowed to use a TI-89, TI-92, or Voyage 200, or any other calculator which can do "symbolic calculus" on the tests and quizzes.

Generally, homework will not be collected.

Class participation and preparation will be a factor in assigning your course grade. You will not be able to make up points missed due to unexcused absences.

- Tests:**
- (a) Three 100 point tests.
 - (b) Many short, unannounced "homework quizzes". These will be about 10 minutes long and 10 points each. Your lowest 2 quiz scores will be dropped.
 - (c) A comprehensive Final Exam.

Tests during the semester will be weighted as follows -

Quizzes	100	pts. (approximately)
3 Tests	300	pts.

The Final Exam is $\frac{1}{3}$ or $\frac{1}{2}$ of your course grade. It counts more if it's better than your previous work, and less if it's worse.
